JSS MAHAVIDYAPEETHA

JSS SCIENCE AND TECHNOLOGY UNIVERSITY, MYSURU

Computer Science and Engineering

III Semester: CIE-1 / EVENT 1

COMPUTER ORGANIZATION

Duration (In hrs): 1.15 Hrs Date:12/11/2025 Max. Marks: 30

NOTE: Question 1 is compulsory, Question 2 and 3 has internal choice.

Q.No	CO	CD	PI	QUESTION	MARKS
1.	CO1	L3	1.4.1	a. Describe different types of addressing modes used in RISC architecture, giving one example for each b. Perform 2's complement addition on (-14) & (+9) c. Perform 2's complement subtraction on 27 & 13	8+3+4 = 15
2.	CO1	L2	2.3.1	a. Illustrate the basic structure of a computer using a neat block diagram and write a brief note on the functionality of each unit. b. Write an assembly level language code for sum of n numbers using branching and indirect addressing.	8+7 = 15
				OR	
3.	CO1	L2	2.3.1	a. Discuss the factors that influence the performance and speed of a computer system. b. Write an assembly program to find the sum of all scores for each test and store the respective totals in SUM1, SUM2, and SUM3	8+7 = 15

CO	Course Outcomes	Cognitive Domain
CO1	Apply the basic concepts of computer, instruction set architecture, function and characteristics of a computer system and design the assembly language for the sequence of machine instruction.	L3

PI	
1.4.1	Apply theory and principles of computer science and engineering to solve an engineering problem
2.3.1	Able to apply computer engineering principles to formulate modules of a system with required applicability and performance
